HOME ENERGY AUDIT REBATE PROGRAM

Program Information Guide

ENERGY CAPITAL OF THE NATION • CITY OF GILLETTE, WYOMING

February 2012

Home Energy Audit Rebate Program

Basic Energy Audit - $250.00

(for a house up to 2,000 square feet - based on the outside measurement excluding the garage)

$50.00 for each additional 500 square feet up to 5,000 square feet house. For houses larger than 5,000 square feet please call for a quote.

NOTE: The City will rebate $20.00 for each additional 500 square feet up to a 5,000 square foot home.

What's Included in the Basic Audit?

A GENERAL OVERVIEW & VISUAL INSPECTION OF YOUR HOME

A certified energy auditor will conduct a basic energy analysis of your home and deliver a complete report with all the details, including specific actions you can take to improve your home's energy efficiency.
This test will take approximately 2 hours.

1. **Home owner questionnaire and preparation sheet**
2. **A blower-door test**
3. **A basic infrared inspection**
4. **A combustion safety test and carbon monoxide (CO) check**
5. **Heating and structural efficiency**
6. **Water heating**
7. **Air conditioning**
8. **Laundry**
9. **Refrigerator/freezer**
10. **Lighting**

The CITY OF GILLETTE is offering a $125 rebate

for its residential utility customers*

A Certified Energy Auditor will help you learn:

- **Techniques to lower your home's energy use**
- **How much money you could save when you use less energy**
- **How energy efficiency can also improve your comfort in your home year-round**

Conducting a HOME ENERGY AUDIT is an effective way to identify if energy efficient improvements are justified.

If improvements are justified, a homeowner can then decide which improvements to make and in what sequence.

Advanced options

(These advanced options must be scheduled with the basic audit and will be administered during the audit.)

1. **Advanced Infrared inspection:** $400.00
2. **Duct Blaster test:** $150.00
3. **A comprehensive in-depth energy use modeling:** $400.00
4. **Post improvement/retrofit:** $150.00

Which audit is right for you?

For some homes, the Basic Energy Audit is sufficient. For others, there can be significant benefit in having additional options be performed. Consider the age of your home, improvements or updates done, size of your energy bills. If you have concerns about a specific problem in your home, review the options and select one that would address your concerns.

Making energy improvements

Home Energy Audits are meant only to show you how you can increase the efficiency and comfort of your home and potentially reduce your energy costs. You are under no obligation to make the suggested improvements; the auditor does not complete any of the improvements and can provide guidance on selecting reputable contractors to perform the improvements.

Most of the improvements can be done by a handy homeowner who is willing to do the work and some are simple every day actions. The energy efficient improvements may qualify for the 30% Federal Residential Energy Efficiency Tax Credit and may qualify for some state incentives. Please consult your tax preparer for details and limitations.

*NOTE: Please visit the City's web site for **Tips For Hiring a Contractor***

Rebate forms are available at Customer Service at City Hall or can be downloaded from the City's web site.

**Rebates are for Basic Energy Audits only; conducted by the City's partner, Green Steps, Inc.*
