FROM: Wendy Clements, City Arborist
DATE: April 19, 2019
RE: Arbor Day Celebration - Friday, April 26, 2019

I would like to take this opportunity to invite Mayor Carter-King, members of the City Council and Parks and Beautification Board to the Arbor Day Celebration that will be held on Friday, April 26, 2019, beginning at 1:00 p.m. The location will be at Stocktrail School, located at 800 Stocktrail Ave. In Spring of 2015, the Forestry Division helped transplant many trees from the site to City Parks during the school rebuild. In Fall of 2018, the Forestry Division returned to the school and gave a hands-on presentation to the second grade as part of the Community Helpers curriculum standard. For Arbor Day, we will return to Stocktrail school and to transplant a Bur Oak tree with the same second grade class.

The celebration will begin with Mayor Carter-King greeting the attendees and giving a reading of the Arbor Day proclamation. After that, a representative from the Wyoming State Forestry Division will present the City with the Tree City USA award for the 27th year. With assistance from the Mayor and the second graders, the CCSD and City Arborist will use the City's tree spade to transplant a Bur Oak tree. The students will also learn why the Arborist is "The Lorax" of the City and receive an Arbor Day themed goody bag that includes a plantable pencil made from recycled tree material.

If you need any further information, please feel free to contact me.

Wyoming Cost of Living Index for the Fourth Quarter of 2018

CHEYENNE – The State of Wyoming, Economic Analysis Division reported that Wyoming experienced a 2.5 percent increase in annual (**All Items**) inflation from the fourth quarter of 2017 to the fourth quarter of 2018. Inflation is measured over six consumer categories in the Wyoming Cost of Living Index (WCLI). Statewide annual inflation rates by consumer category for the fourth quarter of 2018: Medical (4.8%), Apparel (4.7%), Transportation (2.8%), Food (2.6%), Housing (2.0%), and Recreation & Personal Care (1.2%). During this same time, the U.S. Consumer Price Index (U.S. CPI) reported inflation of 1.9 percent (December 2017 to December 2018).

Inflation figures are also available for five regions in the State. For the fourth quarter of 2018, the Northeast region recorded the highest annual increase (4.8%) followed by the Central (2.7%), Northwest (2.3%), Southeast (1.9%), and Southwest (1.0%). Inflation measures year-over-year prices changes. The inflation figures compare the fourth quarter of 2018 to the fourth quarter of 2017.

The Wyoming Cost of Living Index (WCLI) consists of two parts, **Inflation**, which measures year-over-year change (annual) and the **Comparative Cost of Living Index** which compares each county's cost of living in one period (not over time) to the statewide average. The inflation figures for the fourth quarter of 2018 represent the percent change in the price level of a standard basket of selected consumer items priced in the fourth quarter of 2018, compared with the price level of the same goods recorded one year ago (fourth quarter of 2017). The Comparative Cost of Living Index represents each county's price level compared to the statewide average (100) during a single time period, in this case, the fourth quarter of 2018.

For the fourth quarter of 2018, the Comparative Cost of Living Index ranked Teton (159) as the county with the highest **All Items** value, which indicates that the cost of living in Teton County was estimated 59 percent higher than the statewide average in the quarter. Sublette County ranked second in the **All Items** Comparative Cost of Living Index (106).

The **Housing** category carries the largest weight in a consumer's budget and typically drives the overall Comparative Cost of Living Index values. Comparative Cost of Living Index data were also produced by consumer category for every county. Counties with **Housing** category index values above the statewide average in the fourth quarter of 2018 included Teton (213), Laramie (108), and Sublette (105).

Counties with lower **All Items** Comparative Cost of Living Index values in the fourth quarter of 2018 include Lincoln-Kemmerer, and Niobrara. These counties have small, rural populations and typically show lower **All Items** Comparative Cost of Living Index values.

Comparative Cost of Living Index values for all counties in Wyoming are listed in Table 1 on page 3. Movement in ranking from a previous survey does not indicate that the price level has increased or decreased in a particular county. Instead, these values reflect relative price levels in each county, *at the time of data collection*, compared with the statewide average of 100.

Survey Methodology

The WCLI is produced biannually, the second quarter and fourth quarter. Price data are collected in twenty-eight cities and towns in Wyoming and the data are used to build a Comparative Cost of Living Index by county and to estimate overall inflation rates for Wyoming and the five designated regions of the State. A map of the twenty-eight cities where price data were collected is on page 4.

Communities across the State are included in the WCLI based on the following criteria: First, the largest city or town in each county is priced; additionally, prices are collected in any city or town with populations greater than 5,000 or in cases of a city or town having at least 80 percent of a county's largest community's population. In counties where only one community was priced, those prices were used to represent the entire county. In counties where two communities were surveyed, a population-weighted average of the prices for the two communities was used for the entire county. In addition, starting with the second quarter of 2003 WCLI report, Afton, in Lincoln County, was added as a sampling point through legislative action in 2003. Kemmerer is still priced. Afton and Kemmerer report separate Comparative Cost of Living Index numbers. Beginning with the second quarter of 2004, Afton, has been included in the inflation calculations.

The 140 consumer items surveyed were aggregated into six categories, which were then weighted using item weights from the U.S. Bureau of Labor Statistics (BLS), Consumer Price Index (CPI-U), reflective of their overall importance in the average consumer's budget. These categories, and their respective weight components, include Housing (48.1%), Transportation (16.5%), Food (13.4%), Recreation & Personal Care (9.5%), Medical (8.7%), and Apparel (3.8%).

The data are weighted by population to more accurately represent the price changes experienced by the majority of consumers in Wyoming, which showed an overall, statewide inflation rate of 2.5 percent in the fourth quarter of 2018. Nationally, the inflation rate from December 2017 to December 2018 was 1.9 percent (CPI-U), as reported by the BLS in the Consumer Price Index.

The Division wishes to extend its sincere appreciation to all of the businesses and individuals whose cooperation and assistance made this survey possible.

MORE THAN HALF OF WYOMING COUNTIES LOST POPULATION IN 2018

CHEYENNE – Wyoming’s total resident population contracted to 577,737 in July 2018, according to estimates from the U.S. Census Bureau. The annual decrease from July 2017 was 1,197 persons, or 0.2 percent, which was the third consecutive year of decline. However, this decrease was a lot less than the previous year’s loss of 5,356 residents or 0.9 percent.

Thirteen counties experienced population declines from July 2017 to July 2018. Sweetwater County led the state with the largest numerical loss of 496 residents, while Hot Springs County suffered the steepest decrease, -2.8 percent. Carbon and Washakie counties also experienced a decline of nearly 2.0 percent, each. Lincoln was the only county that demonstrated an increase of close to 1.0 percent. Most other counties with moderate increases are located in the Northwest and the Southeast areas of the state where there are minimal energy extraction operations. Since 2010, the fastest growing counties were Teton (8.4%), Laramie (7.7%), and Lincoln (7.3%). “Employment drives migration change, particularly for young adults,” said Amy Bittner, Senior Economist with State of Wyoming, Economic Analysis Division. “People tend to move to areas where jobs are available. Conversely, people may leave areas where employment opportunities become limited.” Even though Wyoming’s economy has been rebounding since late 2016, the speed of the recovery was still moderate. Between the second quarter of 2017 and the second quarter of 2018, about 2,000 or 0.7 percent payroll jobs were added. Campbell, Converse, and Sublette counties have gained the most jobs, but the overall labor force was still at a lower level than before the economic downturn. These counties have the most mineral activities and endured the heaviest employment losses during the downturn. In addition, the labor market nationwide, particularly in neighboring states such as Colorado, Utah, and Idaho, continued to show strong growth, which drew Wyoming workers and residents.

However, after six years of decline, the state’s labor force has finally stabilized or even ticked up by the end of 2018. With a current unemployment rate of below 4.0 percent, which is among the lowest rates in ten years, Wyoming’s job market is quite tight. As a result, average working hours in private industries have gradually been increasing to the level before the economic downturn, and growth in hourly earnings were particularly strong – the fastest in many years. “Wyoming’s current labor market environment is definitely providing opportunities and encouragement for people who are looking for jobs within the state,” Bittner commented.

1. Total population change includes a residual. This residual represents the change in population that cannot be attributed to any specific demographic component. See Population Estimates Terms and Definitions at <http://www.census.gov/programs-surveys/popest/about/glossary.html>.

2. Net international migration for the United States includes the international migration of both native and foreign-born populations. Specifically, it includes (a) the net international migration of the foreign born, (b) the net migration between the United States and Puerto Rico, (c) the net migration of natives to and from the United States, and (d) the net movement of the Armed Forces population between the United States and overseas. Net international migration for Puerto Rico includes the migration of native and foreign-born populations between the United States and Puerto Rico.

Snow Event Report #25

Event Start Date: 4/10/2019 Event Start Time: 3:30 a.m.
Event End Date: 4/11/2019 Event End Time: 5:00 a.m.
Duration of Event: 25.5 Hours Streets First Responders: Jeremy Hagen

Storm Event Overview:

A winter storm warning was in effect the early morning hours of 4/10/2019. Night Crew Leader Jeremy Hagen observed at about 3:00 a.m. that the overnight rain had changed to snow. Hagen went out and began checking bridges, he saw that roads were becoming snow covered. Hagen called in the night crew to plow starting the snow event at 3:30 a.m. Night crew plowed priority streets as snowfall increased until 7:00 a.m. when the day crew took over plowing. Night crew stayed on until 11:00 a.m. and assisted with plowing the rapidly accumulating wet slush and snow.

Day crew made good progress through the priority streets as warm ground temperatures kept plowed areas open. Parks and Solid Waste crew members assisted plowing subdivision streets through the day. The crews were able to clear the priority streets and subdivisions by 4:30 p.m. and suspended plowing activities.

Light snowfall later resumed and continued into the evening, and night crew came in to check trouble areas and attempt a downtown clean up. Temperatures quickly dropped and snowfall increased, sending the night crew back to their priority routes as streets became rapidly icy and slick. The night crew worked overnight on priority streets and trouble areas to combat the icy and snow drifting conditions. By the early morning the weather had settled allowing the crew to complete plowing and treating priority and subdivision streets. The night crew finished their routes and the event was ended at 5:00 a.m.
