- | | | | | | |
|-----------------------------|--------------------------|-------------------------------|---------------------------------|-------------------------|-------------------------------------|
| New Participant Pipe | New Master Meter | Isolation Valve | Well Head | Other Utility Pipelines | Potential Regional Participants |
| Special Construction | Air/Vac Valve | New Pump Station | Pump Station | Sanitary Sewer | Gillette City Limits |
| Pipe Encasement | Altitude Valve | New Storage Tank | Storage Tank | Storm Drainage | Gillette Current Planning District |
| Pipe Bore | Blowoff | Existing Collection Waterline | Existing Distribution Waterline | Overhead Power | Gillette Proposed Planning District |
| | Chlorine Booster Station | Overhead Telephone | | Underground Power | Cities and Subdivisions |
| | | Underground Telephone | | Matchline | |

NOTE:
This layout map is based on available topographic information and indicates the approximate proposed waterline alignment. Easements, right-of-ways and property ownership have not been investigated along the route. Locations of all utilities, structures, drainage and natural features are only indicated where data was readily available and are approximate. No survey, utility locates, or underground investigation have been conducted. Data provided by USGS, State of Wyoming, Campbell County, City of Gillette, and ESRI.

1 inch = 200 feet
