|-----------------------------|--------------------------|------------------------|---------------------------------|-------------------------|-------------------------------------|
| New Participant Pipe | Air/Vac Valve | Isolation Valve | Existing Well Head | Other Utility Pipelines | Potential Regional Participants |
| Special Construction | New Master Meter | Pump Station | Existing Storage Tanks | Sanitary Sewer | Cities and Subdivisions |
| Pipe Encasement | Altitude Valve | New Pump Station | Existing Storage Tanks | Storm Drainage | Gillette City Limits |
| Pipe Bore | Blowoff | New Storage Tank | Airport Line 1 | Overhead Power | Gillette Current Planning District |
| Pipe Crossing | Chlorine Booster Station | Existing Storage Tanks | Existing Collection Waterline | Underground Power | Gillette Proposed Planning District |
| | | | Existing Distribution Waterline | Overhead Telephone | Matchline |
| | | | | Underground Telephone | |

NOTE:
This layout map is based on available topographic information and indicates the approximate proposed waterline alignment. Easements, right-of-ways and property ownership have not been investigated along the route. Locations of all utilities, structures, drainage and natural features are only indicated where data was readily available and are approximate. No survey, utility locates, or underground investigation have been conducted. Data provided by USGS, State of Wyoming, Campbell County, City of Gillette, and ESRI.

1 inch = 200 feet
