APPENDIX A

Permits
Test Well #1 (M-11)
City of Gillette
Attention: Charles Anderson
P. O. Box 3003
Gillette, WY 82717

Re: Temporary Use Permit No. 2119
Two Madison Formation Test Wells and Access Roads

Dear Mr. Anderson:

The Board of Land Commissioners in regular session April 7, 2011, approved the above temporary use permit for a one year term. Approval was based on consideration of $4,374.55.

Enclosed for your disposition is a copy of the temporary use permit. If you have any questions, please contact this office.

Sincerely,

Jamie Van Hatten
Real Estate Management and Farm Loans

enclosure
STATE OF WYOMING
BOARD OF LAND COMMISSIONERS

TEMPORARY USE PERMIT

PERMIT NO. 7119

PERMITTEE:
NAME: Philip Hendricks
ADDRESS: 700 Icicle Rd
Cody, WY 82414
PHONE: (307) 527-3300

This permit authorizes only the use indicated below:
- Construction Access
- Helicopter landings
- Seismic testing/monitoring
- Road construction
- Water removal facilities
- Other: Drilling Madison Formation test well

More specifically:
- The Madison portion of the test well is for testing the Madison test well for water supply needs. The test well will also include a fracture test well.

This permit authorizes the following improvements:
- (Drill test well)

This permit is valid only on the following state land:
- Alleged Section 34, Township 33N, Range 77W, 1/2th of Section 35, Township 33N, Range 77W

This permit commences on April 1, 2011 and expires on April 1, 2012.

Permittee shall pay the Board of Land Commission $500.00 per well site plus $5.00 per rod for 674.91 rods of access road provided at one installation of $4,374.55 due on or before April 1, 2011. If no payment is received on or before April 1, 2011, the permit shall terminate immediately.

This permit is issued pursuant to Chapter 14 of the Rules and Regulations of the Board of Land Commissioners. THIS PERMIT IS NON-TRANSFERABLE.

Date: March 21, 2011

[Signature]
Director, Office of State Lands and Investments

Date: April 11, 2011

[Signature]
Land Commissioner
GENERAL CONDITIONS.

1. Permittee shall maintain operations in a manner which maintains balance in the land.

2. Permittee shall close all vehicular and pedestrian access roads at the request of the Board of Land Commission, and at the request of the Office of State Lands and Investments, if required. The Board of Land Commission may, in its discretion, require such action to be taken at any time.

3. Permittee shall report without delay, any damage to the access roads and structures.

4. Permits shall be closed at the termination of the permit.

5. Permittee shall terminate the permit prior to the expiration date as recorded in the Office of the Office of State Lands and Investments.

6. The permit shall remain in effect until the expiration date as recorded in the Office of State Lands and Investments.

7. The permittees shall agree to be responsible for the permits issued by the permittees, and the permittees shall indemnify and hold harmless the permittees from any claims, losses, or damages resulting from the permit.

8. Permittees shall comply with all state, federal, and local laws and regulations.

9. Permittees shall comply with all local, state, and federal laws and regulations.

10. Permittees shall comply with all local, state, and federal laws and regulations.

SPECIFIC CONDITIONS FOR THE NADSON FORMATION USE WELLS AND ACCESS ROADS.

1. Permittees shall only be authorized to drill test wells. The test wells shall be properly equipped to be a source of water for the City of Oakland. A permit shall be required for any further action beyond this.

2. Permittees shall not make any improvements to the existing roads unless absolutely necessary to get the drilling equipment to the test well sites. Permittees will make every effort to minimize damage to the roads by not going where necessary.

3. If there are no test wells, the permittee shall be required to drill test wells, and the test wells shall be closed prior to the expiration of the permit.
WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY
WATER QUALITY DIVISION
PERMIT TO CONSTRUCT

PERMIT NO 11-065

City of Gillette Madison Well 11
Madison Pipeline Project

This permit hereby authorizes the applicant

City of Gillette
P.O. Box 3003
Gillette, Wyoming 82716-3003

To drill, construct, test, and plumb the City of Gillette Madison Well 11, according to the procedures and conditions of the application number 11-065. The project is located in the southeast quarter of Section 36, Township 52 North, Range 67 West in the county of Uinta in the State of Wyoming. All construction, installation, or modification allowed by this permit shall be completed within one year of issuance (July 20, 2012).

The issuance of this permit confirms that the Wyoming Department of Environmental Quality (DEQ) has evaluated the application submitted by the permittee and determined that it meets minimum applicable construction and design standards. The compliance with construction standards and the operation and maintenance of the facility to meet the engineer's design are the responsibility of the permittee, owner, and operator.

Granting this permit does not imply that DEQ guarantees or ensures that the permitted facility, when constructed, will meet applicable discharge permit conditions or other effluent or operational requirements. Compliance with discharge standards remains the responsibility of the permittee.

Nothing in this permit constitutes an endorsement by DEQ of the land application described herein. This permit only authorizes the construction, installation, or modification allowed by Wyoming statutes, rules, and regulations. The DEQ assumes no liability for, and does not in any way guarantee or warrant the performance or operation of the permitted facility. The permittee, owner, and operator are solely responsible for any liability arising from the construction or operation of the permitted facility. By issuing this permit, the State of Wyoming does not waive its sovereign immunity.

The permittee shall allow authorized representatives from DEQ to enter and inspect any property, premises, or place on or at which the land application is located for the purpose of investigating actual or potential sources of water pollution, and for determining compliance or non-compliance with any rules, regulations, standards, permits, or orders.

Nothing in this permit shall be construed to preclude the institution of any legal action or other proceeding to enforce any applicable provision of law or rules and regulations. It is the duty of the permittee, owner, and operator to comply with all applicable federal, state and local laws, rules and regulations in the exercise of its activities authorized by this permit.

The issuance of this permit does not convey any property rights in either real or personal property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.
The applicant shall operate and maintain the permitted facility in accordance with the terms and conditions of the permissive facility operating permit. The permit holder or its agent shall comply with any duly adopted and effective federal, state, or local laws.

In carrying out its activities authorized by this permit, the permit holder, owner, and operator shall comply with all of the following permit conditions:

1. The applicant will provide adequate data and information to the Northeast District Water Quality Division, 152 North Burton, Suite 200, Casper, WY 82601, to support the permit permit to the Northeast District Water Quality Division, 152 North Burton, Suite 200, Casper, WY 82601, a certificate of completion signed by the Engineer of Record or the owner. A maintained Certificate of Completion has been provided.

2.a. Dates the construction of the facility was commenced and completed.

2.b. Date that the facility was placed in service.

2.c. Certification that the facility was constructed in accordance with the terms and conditions of the permit.

2.d. Certification that the facility was maintained in accordance with the terms and conditions of the permit.

2.e. Submit the following information with the Certificate of Completion:

1) The installation permits and approvals.
2) All design documents and operational manuals.
3) A list of all monitoring equipment.
4) Any other applicable information.

3. Discharge in accordance with Chapter 12, Section 12.15 of the Wyoming Water Quality Rules and Regulations shall be performed.

4. The applicant will perform all state and federal tests in accordance with Chapter 12, Section 12.15. Results of these tests are to be provided with the Certificate of Completion.
The review and approval of this permit is based upon the items identified in the attached Statement of Basis.

AUTHORIZED BY:

John F. Wagner
Administrator
Water Quality Division

Date of Issuance:

7/20/11

JUL11:11-0681

at WDEQ Casper Field Office

John V. Corra
Director
Department of Environmental Quality
STATEMENT OF BASIS

Project Number: 11-065

2. Application reviewed for compliance with the following applicable regulations:

3. Does the permit comply with all applicable regulations cited above?
   - Yes

   Facility includes components not specifically covered by or differing from applicable regulations and approval is based on deviation in accordance with Section 5

   Facility will have a variance of Section 9, Title 17, Wyo. Stat. Annotated, Lightweight concrete slurry. The lightweight concrete slurry will be required to meet Wyoming DEQ and Gas Commission rules Section 22 and must be approved by WFDO before being used in well construction.

4. Documentation of Statement of Basis

   The attached files for this permit will include adequate documentation of all sections of this Statement of Basis.

CERTIFICATIONS

The issuance of this permit is based upon a review of the application package submitted in accordance with the requirements of Section 5, Chapter 17, Wyoming Water Quality Rules and Regulations. The work was performed by Denver River and completed on July 20, 2010. Permit issuance is recommended based upon statements, representations, and procedures presented in the permit application and supporting documentation. Permit conditions and restrictions noted in the "Statement of Basis."

The review of the safety and adequacy of proposed new or existing industrial waste handling facilities and their operation is the responsibility of the Department of Environmental Quality.

A. Wyoming Water Quality Regulations are administered by the Wyoming Water Quality Office (WWQO), an office of the Wyoming Department of Environmental Quality (DEQ), Division of Water Quality (DOWQ), an office of the DEQ.

Specific chapters of the Wyoming Water Quality Rules and Regulations have been developed for each of the areas that require a permit. The regulatory chapters for those projects that are subject to the DEQ's approval are:

- Design and Operate for Sewage/Septic Systems Treatment/WWQRI Systems
- Design and Operate for Public Water Supplies including production wells and water and wastewater
- Standard Wells for Industrial Wastewater
- Water and Wastewaterlicenses

For more information, please contact the WWQO at 307-777-7781.

CERTIFICATION OF COMPLETION

In accordance with the condition of the Wyoming Department of Environmental Quality Water Quality Division Permit to Construct No. _______ requiring submittal of this Certification of Completion within sixty (60) days of completion of the facility, I hereby certify:

1. Construction of the permitted facility was completed on _______ (DATE) and the facility was placed in operation on _______ (DATE).

2. Construction was completed in accordance with the following: (Check the appropriate option)

   - The facility was constructed in compliance with all terms and conditions of the permit including the design report, plans and specifications, design data or other information submitted in support of the application.
   - The facility was constructed with changes or modifications in accordance with the provisions of Section 9, Chapter 8, Wyoming Water Quality Rules and Regulations. As-built plans and specifications, certified by a registered professional engineer (certification by an engineer is not required if the original application was not certified by an engineer), are enclosed.

City of Gillette
111 N. McAndrew St.
Gillette, WY 82718

Date: April 18th, 2001

To the State Engineer:

You are advised that the City of Gillette, through the application for permit number U.W. 195671 & 195672 submitted May 23, 2001, requests permission to continue the groundwater withdrawal for Monitoring/Test purposes. The City of Gillette is interested in testing a new water source and requires the following actions to be taken:

PERMIT NUMBER
U.W. 195671 & 195672

By this permit, the applicant is hereby authorized to continue the withdrawal of water as detailed above. If the required notices are not returned to this office within the statutory time limits set forth, the permit(s) will be subject to cancellation, which acts as a forfeiture of the water right granted by this permit.

The City of Gillette is required to submit monthly reports on the use of water in this water right. The City is requested to provide such reports to the State Engineer's Office, prior to the end of each calendar month. The report shall include the quantity and purpose of the water withdrawn, and any other information required by the State Engineer's rules and regulations. The City is also required to comply with the terms of this permit in all respects.

State Engineer's Office

IMPORTANT NOTICE - PLEASE READ CAREFULLY

The purpose of the State Engineer's Office is to administer the water laws of the State of Wyoming and to provide for the efficient use and conservation of the State's water resources. The State Engineer is vested with the authority to issue permits for the development, use, and control of water resources pursuant to the provisions of the State's water laws.

Examination of water rights is conducted to ensure compliance with the State's water laws. This includes the review of applications for new permits, renewals, and modifications to existing permits. It is important to note that water rights are subject to change based on changes in the State's water laws and water conditions.

For more information, please contact the Wyoming State Engineer's Office at 307-777-7500. You can also visit our website at www.state.wy.us/engineer for additional resources and information.

Sincerely,

[Signature]

State Engineer
The Department of Energy and the Department of Defense are collaborating on a new program to improve the energy efficiency of military bases. The program, called the Energy Savings Initiative (ESI), aims to reduce energy consumption and costs by implementing energy-saving technologies and practices.

The ESI program will focus on several key areas, including:

1. **Energy Audits**: Conducting comprehensive energy audits to identify areas of inefficiency and potential savings.
2. **Renewable Energy**: Increasing the use of renewable energy sources such as solar, wind, and geothermal.
3. **Energy Efficiency Measures**: Implementing energy-efficient practices and technologies in buildings and facilities.
4. **Demand Response**: Developing strategies to reduce energy demand during peak usage periods.

The program will be implemented in a phased approach, starting with a pilot project at a select number of military bases. Preliminary results indicate significant potential for energy savings and cost reductions.

The Department of Energy and the Department of Defense are committed to working together to achieve these goals and contribute to a more sustainable future.

Sincerely,

[Signature]

Authorization to Discharge Wastewater Associated with Ground Water Well Pump Testing and Development

Well Pump Tests of Domestic Use Water Supplies
Under the Wyoming Pollutant Discharge Elimination System

Authorization #: WAG720291

This is a renewed authorization under the renewed General Permit for Temporary Discharges.

In compliance with the provisions of the Federal Water Pollution Control Act and the Wyoming Environmental Quality Act,

Jean Christensen Company Inc., Water District F T. Box 434 Lander, Wyoming 82071

is authorized to discharge wastewater associated with Ground Water Well Pump Testing and Development activities from:

Tollena Madison Pipeline Project Test Wells

Outfall 001: Section 36, Township 52N, Range 5W, Lat. 44°45'33" N, Long. 104°34'53"
Campbell County

Outfall 002: Section 35, Township 52N, Range 5W, Lat. 44°42'10" N, Long. 104°32'35"
Campbell County

into surface waters of the State of Wyoming in accordance with the requirements of the renewed General Permit for Temporary Discharge Associated with Ground Water Well Pump Testing and Development.

Receiving Waters: unnamed ephemeral tributary to Spring Creek, both class 3B1, Bighorn River Basin

The wastewater discharged from this location associated with WELLPUMP TESTS OF DOMESTIC WATER SUPPLIES shall be limited and monitored by the parameters as specified below.
### Effluent Limitation

</table>

If the duration of the discharge is shorter than the required sample frequency, a minimum of one sample shall be taken for all parameters.

All waters shall be discharged in a manner to prevent erosion, scouring, or damage to stream banks, stream beds, ditches, or other waters of the state at the point of discharge. In addition, there shall be no deposition of substances in quantities which could result in significant aesthetic degradation, or degradation of habitat for aquatic life, plant life, or wildlife; or which could adversely affect public water supplies or those intended for agricultural or industrial use.

**REPORTING REQUIREMENTS FOR THIS AUTHORIZATION**

Reporting is required monthly, using Discharge Monitoring Reports (DMRs) to be submitted by the 28th day of the month following the completed reporting period, to WYDOE's Permit Section, DEQ WO/D, Herschler Building, 212 West 12th Street, Cheyenne, WY 82002. For eDMR please follow the instructions at the following website: https://sdagateway.environmonitoring.com. For the paper DMR's please follow the instructions at the following website: http://cda.state.wy.us/opgw/DNR/DMRfmt.aspx. If no discharge occurred during the reporting period, "no discharge" shall be reported. The first report is due on February 28, 2015 for any discharges occurring in January, 2015.
For termination of this authorization, the enclosed Termination Notice (also available at http://www.wydeq.com) must be completed and submitted at the completion of the discharge. Authorizations cannot be terminated until all completed DMRs have been submitted to the WQD for review. Once the permittee has received a letter confirming receipt of the termination notice, the permittee does not have to submit any further DMRs.

All WQPDES general permit authorizations are subject to a $100 annual permit fee, so long as the authorization is active or until the general permit expires. The annual billing cycle is based on a calendar year. See the Wyoming Environmental Quality Act § 33-1-312A for further information.

This facility has been assigned permit authorization number WYG.740291.

Coverage under this General Permit for Temporary Discharge Ground Water Well Pump Testing and Development shall begin upon date of signature below and discharges are authorized to continue no longer than August 31, 2015.

If you have any questions concerning the conditions of this general permit, contact Montana Porter at 307-777-3087 or email montana.porter@deq.wy.gov.
