

Windows Vista – Disable UAC

1. Click Start > Control Panel.

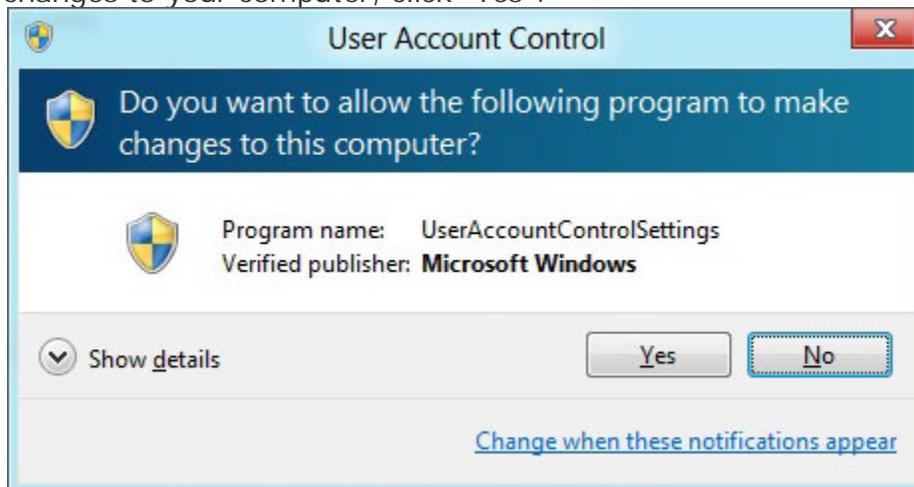

2. Type in "UAC" into the search box. Then click on the link for "Turn User Account Control (UAC) on or off".

3. Make sure "Use User Account Control (UAC) to help protect your computer" is unchecked and click "OK".

4. You will receive a prompt asking if you want "UserAccountControlSettings" to make changes to your computer, click "Yes".

5. **You must reboot** your machine before the changes can be applied.
